

Lucio Arseni

3D motion designer

www.lucioarseni.it

Born in 1994, I'm a freelancer designer based in Milan, Italy. Using 3D and 2D techniques, I work in **graphic** and **motion graphic** for brands, companies, events and privates.

I love **drawing**: my style is minimal but, where is appropriate, also toon or realistic. In addition, I like to develop generative graphics, applications and interactive installations using **coding** and **electronic** devices.

When in teamwork, I'm open and flexible. When alone, I like to implement my own personal workflow, finding creative solutions and enhancing my productivity. In my spare time, I like to play percussions, walk in the nature and gather ideas in lab.
